RF Cables

MultiLane is proud to offer a wide variety of cables to provide connectivity to its test instrumentation and interconnect portfolio. In addition to single cables and phase matched cable pairs, MultiLane offers phase matched sets of cables for improved signal integrity and to match your exact testing needs. Visit the cables section on our website to learn more about their specifications, link [here](#).

Open Eye Solution

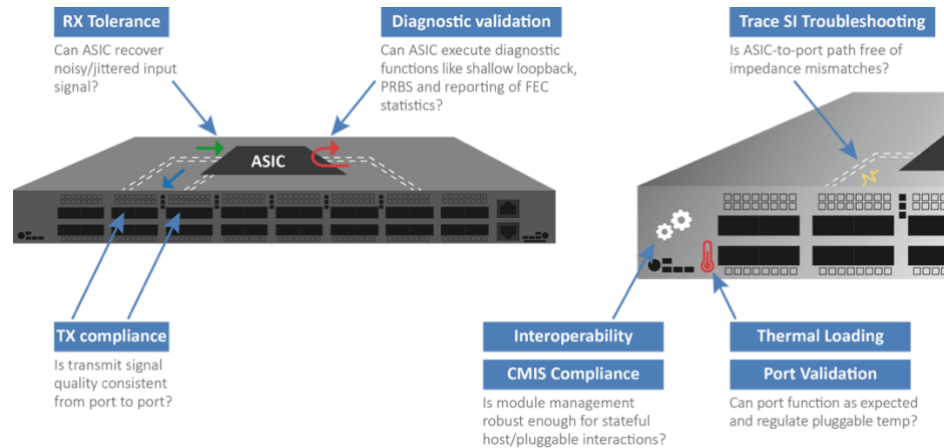

MultiLane now supports the full complement of Open Eye measurements, such as Eye Mask, VEC statistical and deterministic, on the ML4015D optical sampling scope.

Host Testing Solutions

As part of the ever-evolving data center environment, MultiLane has developed a unique suite of test solutions that is capable of debugging and characterizing switch host ports.

This consolidated tool set boasts the capability to execute transmit compliance, CMIS compliance and switch-to-optics interoperability. MultiLane also provides a TDR test solution for comprehensive port troubleshooting and validation.

Advance Calibration and Extended Warranty Purchases

To support the diverse needs of our customer base, MultiLane now provides advance purchasing options for calibration and extended warranty. Customers can choose between three different options below and ensure their instrument meets its intended use case:

- Total 3 year warranty
- One-time calibration
- Total 3 year warranty and 3 annual calibrations
