Lightwave Webinar

Ethernet in the Data Center

MultiLane will be participating in the Lightwave webinar on November 18, 2020. This webinar will highlight transceiver advances and test procedures that will enable network suppliers to offer ever higher Ethernet transmission rates with good performance and reliability at the lowest possible cost. TestConX China 2020

TestConX has, over the course of its twenty-year history, established itself as the preeminent event for test consumables, test cell integration, and test operations.

The program scope has expanded over these years from packaged semiconductor “final” test and burn-in to encompass all practical aspects of electronics testing including validation, advanced packaging testing, system level test, module test, and beyond to finished product test.

This year, Doug Malech and Chuong Huynh represented MultiLane to talk about [high-speed serial testing](#).
