

## 2020 Year-End Newsletter

2020 has been a trying year, but we are proud to have been able to continue supporting the diverse needs of our global customer network.

This year, MultiLane kept innovating with exciting releases like our 800G products, the launch of our new and improved BERT Graphical User Interface ThunderBERT, and our participation in virtual events and technical webinars that allowed us to keep you updated with our latest test capabilities.

With 2020 coming to an end, we wanted to reach out and send our best wishes to you. We wish you Happy Holidays, and a prosperous New Year!

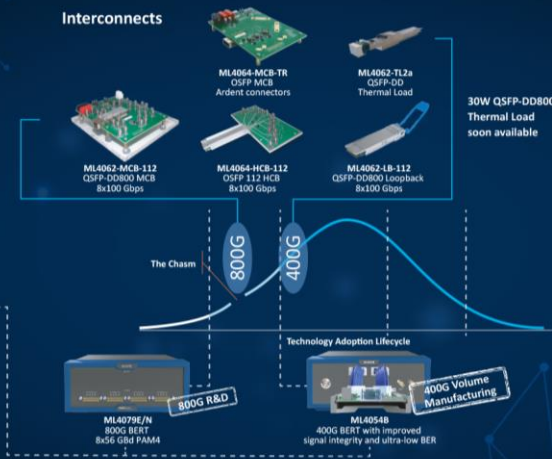

Our offices will be closed during the holidays from Monday December 21<sup>st</sup> to Monday January 4<sup>th</sup>. For any inquiries during this period, contact us at [sales@multilaneinc.com](mailto:sales@multilaneinc.com) or at [fae@multilaneinc.com](mailto:fae@multilaneinc.com) for technical support.

### ThunderBERT

- Revolutionary new BERT GUI
- Easy to use and intuitive workflow
  - Highly responsive

### VIRTUAL EVENTS & NEW MEMBERSHIPS

### A Fresh Take on the ML4039B

In an effort to ensure that our offerings keep pace with industry needs, we are proud to offer the ML4039B in the Enigma instrument enclosure with improved mechanical rigidity and thermal characteristics. Our revolutionary BERT GUI ThunderBERT is also supported on this new version. Check out the link below for all the latest updates on our 4-Lane 200G BERT. [ML4039B](#)

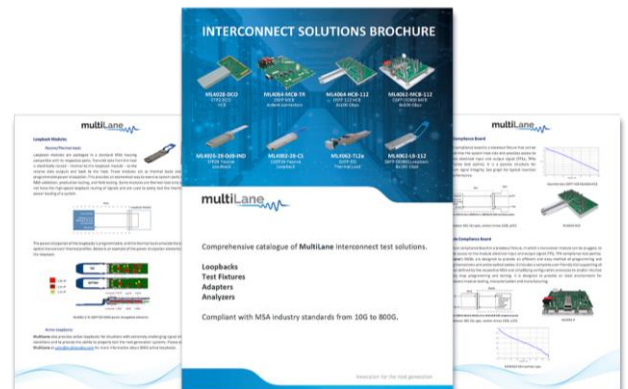

### ECOC Virtual Booth

In case you missed it, you will still be able to access our booth until January 15th, allowing you to catch up on all our latest content! Product demonstrations are also now available on our YouTube profile.

For more information, do not hesitate to contact us at [sales@multilaneinc.com](mailto:sales@multilaneinc.com).

### Interconnect Solutions Brochure

As part of MultiLane's commitment to supporting evolution of the data center, we are providing a complete selection of interconnect solutions for a wide variety of standards. Click [here](#) for our comprehensive catalogue of loopbacks, test fixtures, adapters, and analyzers all compliant with MSA industry standards from 10G to 800G.

### We Value Your Feedback

Please spare a few minutes of your time to fill out this [survey](#) before December 23<sup>rd</sup>. Your answers will allow us to better meet your expectations.
