

## Empowered by Innovation

EPIC PHOTONICS+, USB-IF, HDMI, and more updates!

### EPIC PHOTONICS+ Virtual Exhibition

Join MultiLane at this year's PHOTONICS+ virtual exhibition, on February 17<sup>th</sup>-18<sup>th</sup>. Learn more about enabling 400G/800G Ethernet, hi-speed test challenges and solutions, and much more! PHOTONICS+ is a new, efficient networking event for the photonics industry.

Ask for your free tickets by sending 'Photonics+ free ticket' and your full name by email to [info@multilaneinc.com](mailto:info@multilaneinc.com), and check out our booth [here](#)

### MultiLane Adopts HDMI!

MultiLane is now a proud member of HDMI Forum, a non-profit organization that develops and maintains the connectivity standard, manages interoperability testing and certification, and actively promotes compliant solutions.

### USB-IF Membership

MultiLane is proud to announce membership with the USB Implementers Forum, a powerful network that facilitates the development of high-quality compatible USB products.

*Stay tuned for the MultiLane-effect on USB!*

### Featured Interconnect: What's New?

## QSFP-DD800

QSFP-DD800 is one of the leading multi-source agreements to drive the development of 800G interconnectivity. MultiLane provides a QSFP-DD800 development kit that includes module compliance boards, host compliance boards and loopback modules.

Do you want to characterize your system with up to 30W pluggable power dissipation?

Check out our new loopback: [ML4062-LB2a-112](#)
