

## Expanding Possibilities

Collaborations, new solutions, and much more!

### MultiLane Sponsors EPIC CPO Event

MultiLane is proud to have sponsored EPIC's Online Technology meeting on the 2021 Roadmap for Co-Packaged Optics.

On March 3<sup>rd</sup>, an online discussion was held to address the requirements for CPO assemblies within DCI switch environments. Missed it? You can still watch it [here](#).

### 800G MSA Membership

MultiLane announces its membership with the 800G Pluggable MSA group, an association that promotes joint industry exchange between operators and vendors of the optics industry.

Our released solutions for QSFP-DD800 and OSFP800, including BERTs, compliance boards and loopbacks, will enable MultiLane to support the 800G ecosystem to the fullest.

### 800G Roadmap: The Next Frontier is Here

Always in lockstep with the growing demand in network capacity, MultiLane introduces an expanded 800G solution family.

Our updated 800G roadmap presents a variety of solutions from host port and system testing, to transceiver and DAC characterization. Interested in learning more about our solutions? Click [here](#)!

### ML4015D: A Cost-Effective DSO

MultiLane offers the ML4015D, a fully featured, cost-effective, single channel sampling oscilloscope. ML4015D supports optical or electrical testing and is available as single mode or multimode. Check out our updated datasheet [here](#).

### Featured Interconnect: What's New?

This month's highlight is the ML4064-LB-112. This OSFP 800G Loopback module is MSA compliant, with power dissipation up to 17.5 W (24 W and 30 W versions available as well). Industrial temperature range -40 to 85 °C is also supported. More info can be found [here](#).
