

## Keeping Up with the Industry

Latest Releases, Brochures and more

### Instrument Brochure

Diversity is a building block to MultiLane, so we are constantly widening the scope of form factors and architectures in our product lines to support a myriad of customer needs. Check out our latest instrument brochure for more details on our optical and electrical oscilloscopes, bit error rate testers, TDR cable testers and optical switch boxes. Link [here](#).

### Interconnect Brochure

Our updated interconnect brochure is here! With the industry's increased need for high-speed products, MultiLane's release includes new interconnects of different form factors: DSFP, QSFP56 and QSFP-DD800. For more details, click [here](#).

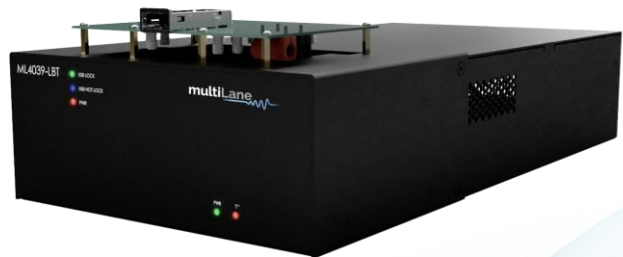

### Featured Interconnect: ML4022-LB

The ML4022-LB SFP-DD Passive Electrical Loopback is used for testing SFP-DD transceiver host ports. By substituting a full-featured SFP-DD transceiver with the ML4022-LB, its electrical loopback provides a cost-effective low loss method for 2x56G SFP-DD port testing. Check out MultiLane's Loopback [here](#).

### ML4039-LBT: Loopback Tester

Make sure to check out our latest addition, the ML4039-LBT. It is a fully automated 25G and 100G Loopback tester that validates the signal integrity and checks the CMIS content of SFP28 and QSFP28 Loopbacks and is ideally suited for a system manufacturing and installation environment. For more information click [here](#).
