

Keeping You in the Loop

CIOE recap, webinar recording, in the news, and more

Leading Lights Awards

MultiLane has been shortlisted as one of the finalists for [Light Reading's](#) Leading Lights Awards for the "Outstanding Test & Measurement Vendor" award, reserved for trendsetting, highly innovative companies that make investors proud and keep employees happy. A full list of the finalists can be found on Light Reading's blog [here](#). Winners will be announced on October 1, 2021.

Find Us on Digi-Key

Get instant access to our most requested Loopbacks, Host Compliance Boards and Module Compliance Boards for the most common MSA form factors such as QSFP-DD. Find us on [Digikey.com](#), link [here](#).

CHINA INTERNATIONAL OPTOELECTRONIC EXPO

China International Optoelectronic Exposition

Although postponed because of the pandemic, the 23rd CIOE saw significant turnout with over 3,200 optoelectronic exhibitors and 80,000 professionals and academics from the optics and photonics world. MultiLane showcased its solutions for 112G/channel 800G development and 400G deployment including the flagship [ML4079E](#) 800G BERT, and [ML4054B](#) 400G BERT. In addition, MultiLane showed its new cable testing solutions for Active Copper Cables, and [ML7007-400G](#), its fully automated 400G transceiver test solution.

Find out how MultiLane can help facilitate your 400G/800G adoption by visiting our [website](#).

Webinar On-Demand

[Lightwave's](#) webinar is now available on-demand. Join MultiLane's Vice President of Marketing, Kees Propstra, and other industry veterans as they highlight key aspects of 400G connectivity, emerging laser technologies, and 800G challenges. Click below to watch the recording.

MultiLane In the News

In addition to our demonstration of [Spectra7's GC1122 solution](#), at CIOE 2021, MultiLane has joined forces with [Spirent Communications](#) to offer vendor-neutral testing solutions for the rapid development of 800G technologies.

As the pre-eminent Signal Integrity expert – performing extensive research and simulations in routing and footprint optimization – MultiLane is offering its design and consultancy services to accelerate the 800G ecosystem.
