

Updating Your Options

CDB Implementation, Updated 400G BERT Options, CE and ROHS Certification, and More

Featured Instrument: ML4079D Option MSM

A variant of MultiLane’s popular 8 channel 400G BERT, the ML4079D with option MSM uses the same tried and true hardware now configured for M-SMPM cables. Ports for the cables are arranged in 4 rows of 4 channels each.

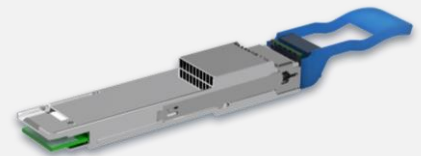

Read the full specifications [here](#).

Featured Loopback: ML4062-LB2a-6dB/9dB

The ML4062-LB2a-6dB/9dB Loss Target passive Loopback module supports 8x112G electrical interfaces and covers all QSFP-DD power classes, with heat dissipation of up to 30 W. The loopback module comes with either 6 or 9 dB of attenuation at 26 GHz built in to emulate specific DAC loss profiles.

Find out more [here](#).

CDB Option Added to the MultiLane CMIS Kit

MultiLane’s Common Management Interface Kit now comes with an option for Common Data Block (CDB) commands – available with a purchasable license. The advanced feature for accelerated module diagnostic functionality will allow users to remotely debug and upgrade modules. It enables Command Data Block messaging and issuing of commands from the MCB to the Module, as per CMIS 4.0 and 5.0. For a full review of the CDB specifications, read the updated [User Guide](#) and contact sales@multilaneinc.com to purchase your license key.

Interconnect Modules Certified for CE & ROHS

All MultiLane’s interconnect modules – including Loopbacks, Module and Host Compliance Boards – are now certified for CE and ROHS. These certifications ensure that MultiLane’s interconnects are up to EU safety standards and are fully usable in the EEA. The labelling of the applicable MultiLane products has been updated accordingly and has been applied to all orders scheduled to be delivered from September 2021 onwards.

Webinar on Demand

COBO’s webinar is now available on-demand. Join MultiLane’s Vice President of Marketing, Kees Propstra, and other industry veterans as they highlight PAM4 interconnect approaches which tackle the unique challenges of 400G and 800G. Click [here](#) to watch the recording.
